**How To View Free online TV and Films etc
Pages 25 to 72**

Sky Digital set top box Secret Engineers menu

Are you having problems with your sky digital box?

Loss of signal

Incomplete recordings

Freezing during playback

Failed recordings

Jumpy playback

Sound problems

No live pause/rewind

Stuck in standby

Defragmentation

Data is stored on a hard drive much like your home PC

This data can sometimes become fragmented especially as you

constantly add and delete data when recording your favourite

programs

Defragmentation reorganizes the files on a disk to optimize the drive

This should not affect any of your recorded programs or settings

To access this hidden feature

Press services

You will see this screen

□

Scroll to system setup

Press select

□

□

□

□

□

□

□

□

□

You will see this screen...

□

□

Now press then on

your Remote handset

Press select

□

□

□

□

□

□

□

□

□

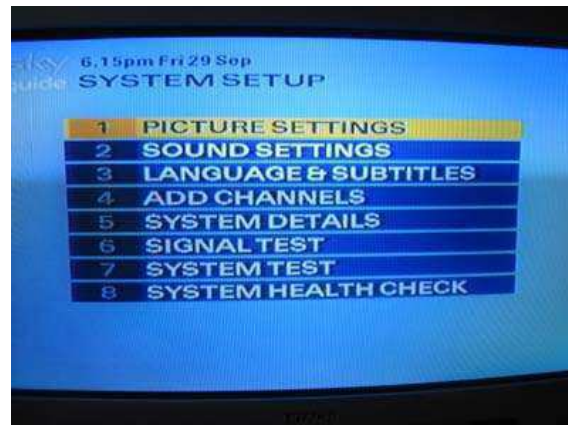

□

You will see this screen...

Scroll down to sky

Planner Rebuild

Press select

This should now activate the defragmentation process

Once completed leave the box on standby for 10 minutes this is important to allow the system to complete the process

If you cannot access this feature you may need to download the latest software to your sky digital box

Software update

To carry out a full software update turn the power off press and hold "backup" on the digibox NOT the remote plug back in and wait for all the lights to come on You should now receive a message on screen informing you of the update

If this has not resolved your problem it may be necessary to perform a full system reset

Full system reset

WARNING This will erase all your recorded programs series links and reminders in your planner

Full System Reset
Press select

You will see this screen...
Press select

A full system reset could take several minutes don't panic if the box does not switch back on immediately

Once completed leave the box on standby for 10 minutes this is important to allow the system to complete the process

UNABLE TO RECORD A DIFFERENT CHANNEL?

You need to test you are receiving both signals and they are of reasonable quality. To do this press

SERVICES then SYSTEM SET UP then SIGNAL TEST.

You can now see the signal strength and signal quality for both signals. They need to be over 100% to record and watch at the same time.

If they are not it could be interference of the signal from trees etc. Poor connection at the dish. LMB poor connection on the sky box. The dish is not correctly aligned or water ingress in the cable.

How to Reset a Sky Digibox when No Signal appears

1.

Reset method: Delete and Rescan

1.

1. Turn the power off at the mains socket. Either do this by pulling the plug from the socket or using a power switch if there is one.

2. Remove the viewing card from the machine. Using a dry cloth or kitchen roll clean the gold connector on the reverse of the card. Do not use any cleaning products.

3. Check cables and connectors are in good order.

4. Wait for at least 30 seconds.

5. With the card still out of the machine plug the Digibox back into the mains.

6. Ignore all the messages and wait for around a minute.

7. Try 101 for BBC One, 102 for BBC Two and 103 for ITV.

8. Insert viewing card, wait a few seconds.

9. Check 101 for Channel 1 and 102 for five.

Reset Method **Reset the LNB**

□

If the above method does not work the LNB may have a fault □

□

□ Press the [SERVICES] button and then press [□] [□] [□] then [SELECT] □

□ Then press [□] to go to the RF output menu □

□ Press [DOWN] three times to highlight the line **Khz Command** and then press [RIGHT] to change the value to [OFF] □

□ Press [DOWN] and [SELECT] to select **Save New Settings** □

□ Press [SKY] □

□ Again press [SERVICES] [□] [□] [□] [SELECT] then [□] again for the **LNB Menu** □

□ Now press the [RED] button reset all settings then [DOWN] until you can select **Save New Settings** again □

□ Press [SKY] □

Reset Method **Upgrade the system software**

If there are still problems □

□ Turn the Digibox off at the mains again and remove the viewing card □

□ Whilst holding down the **BACKUP** key on the Digibox **NOT ON THE REMOTE** - turn the mains power on □

□ Keep hold of **BACKUP** until the screen displays a **UPGRADING SYSTEM SOFTWARE** message - this will be white text on a black screen □ On some boxes this can appear as a half screen □

□ Wait **10 to 15 minutes** for the software to download and install □ The box will restart when the process is complete □

□ Ignore all the messages and wait for around a minute □

□ Try **101** for **BBC One** **102** for **BBC Two** and **103** for **ITV** □

□ Insert viewing card wait a few seconds □

□ Check **101** for **Channel 1** and **103** for **five** □

**HOW TO GET A FREE CALL OUT FROM SKY
YOU WILL THEN BE ABLE TO RECEIVE A FREE REPAIR
OR REPLACEMENT SKY PLUS OR SKY HD BOX**

If you have not been able to repair your sky plus or HD box with these instructions then the box will have a system circuit or hardware fault

The next best course of action I have found is to contact sky when you are connected to customer services explain the problems you are having and ask for a service call out but tell them you cannot afford the £ call out charge if they do not offer you a free call out ask to be transferred to the cancellation department when you are put through to the cancellation department tell them the same thing that you just cannot afford the call out charge and ask to have your sky contract cancelled they will then offer you a half price call out but do not accept this stick to your guns and say you cannot afford even the half price charge they will then take a few minutes and will then come back to you and give you the free visit for a replacement sky plus or HD box or repair take your time on the telephone to them and stay calm and things will be ok this has worked for many of my customers

□

Keeping your sky digital box cool

It is very common to install your digital receiver in a tv cabinet possibly along with a video recorder DVD player surround sound amplifier X Box Playstation and so on all of which produce heat This heat could affect the correct operation of your Sky digital receiver

You could just remove the back panel from your tv unit or keep the display doors open but a very cheap alternative is to fit a cooling fan to your box

Here you can see a standard 12 volt computer power supply cooling fan fitted to extract hot air from the digibox and you don't even have to open up your box simply power the fan with a cheap power adaptor or even one of those spare mobile phone chargers you have lying around the house

Sky Digital remote control programming procedure

□

What?

This procedure is used to program or re-program the Sky Remote Control Unit (RCU) to operate the customers AV Amplifier functions

□

Why?

This procedure is used when the RCU is not operating some or all of the customer's AV Amplifier functions. It is possible that either the installer may not have set the RCU to the correct code or the customer may have changed their AV Amplifier since the original installation took place. In such circumstances it will be necessary to re-program the RCU to the correct model of AV Amplifier.

□

How? TIP

Before proceeding further place your Sky RCU on a flat surface such as the floor or a coffee table

□

□ Turn on the AV amplifier you wish to operate press the TV button on the Sky RCU Remote Control Unit

□ Press and hold down the Select then the zero buttons on the Sky RCU until the LED Light Emitting Diode blinks twice

□ Input the digit number from the Sky RCU direct set code list pages. The LED should flash twice to confirm that the code was entered successfully

□ Use the Left navigation button on the Sky RCU to try and switch the AV Amplifier into standby. If the standby button works then the other AV Amplifier functions should also work and the correct code has been selected. If all functions do not work correctly then repeat steps and work through all the digit numbers from the Sky RCU direct set code list pages until you find the code which supports all or as many of the AV Amplifier functions as possible

Important

The most popular codes are sorted first within the Sky RCU direct set code list therefore the codes should be attempted in sequence one after the other

[note The remote control will operate all functions on the digibox whilst in Sky mode however it does not support the functions on their AV Amplifier at the current time You must therefore keep your AV Amplifier RCU to hand to control the amplifier functions

This is not a fault with the remote or the amplifier

AV Amp Volume Mute Control Punch Thru

If your Sky remote is fairly new or you have the Sky Navigator remote it may be possible to set the normal volume mute controls to work your amp rather than the TV
And without pressing the TV key

□

Proceed as follows

□□ Program the remote as detailed above to control your amp using the arrow keys in TV mode

□□ Press TV Key

□□ Hold down select and press until the remote's LED flashes twice if it only flashes once or remains on steady I'm afraid your remote does not support this feature

□□ Press Sky key and enjoy

□

To reverse the process press select and rather than

□

Sky box stuck in standby

□

Following this procedure may cure the problem BUT you will lose all stored recordings

□□ Unplug the Sky receiver at the mains

□□ Press in the Left and Right navigation buttons on the front of the receiver whilst plugging the receiver into the mains again Do not release the buttons until the green play light comes on this may take about seconds

□□ Press select The play light will then rotate clockwise whilst the reset procedure takes place This may take up to minutes but can vary The receiver will then revert to standby

□□ Leave for minutes whilst the hard drive reformats and then proceed as normal

To view the same Sky channel on another TV follow these simple instructions

To access this hidden feature

Press services

You will see this screen.....

Scroll to system setup

Press select

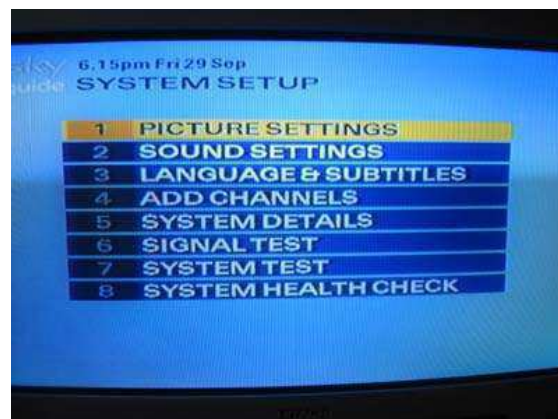

You will see this screen.....

Now press then on

your Remote handset

Press select

You will see this screen.....

Scroll down to RF OUTLETS

Press select

The option to enable the second RF output is usually set to off

no reason why other than Sky probably

wanting to sell you an additional Sky box

Change the option to on and the Save new settings and you should find that your second RF outlet works fine

Upgrading Sky V

Some Basic Instructions For Increasing The Storage Capacity Of Sky

Note No PC Is Required For This Upgrade Just A Brand New Hard Drive

The Drive Does NOT Need Any Preparation Formatting Etc

Visit The Copy Website For An Excellent List Of Drives

Also If You Wish To Transfer All Your Recordings From Your Old Drive To Your New Drive Also Visit The Copy Website

The Standard Gb Drive Fitted In Sky V Is A Maxtor F L

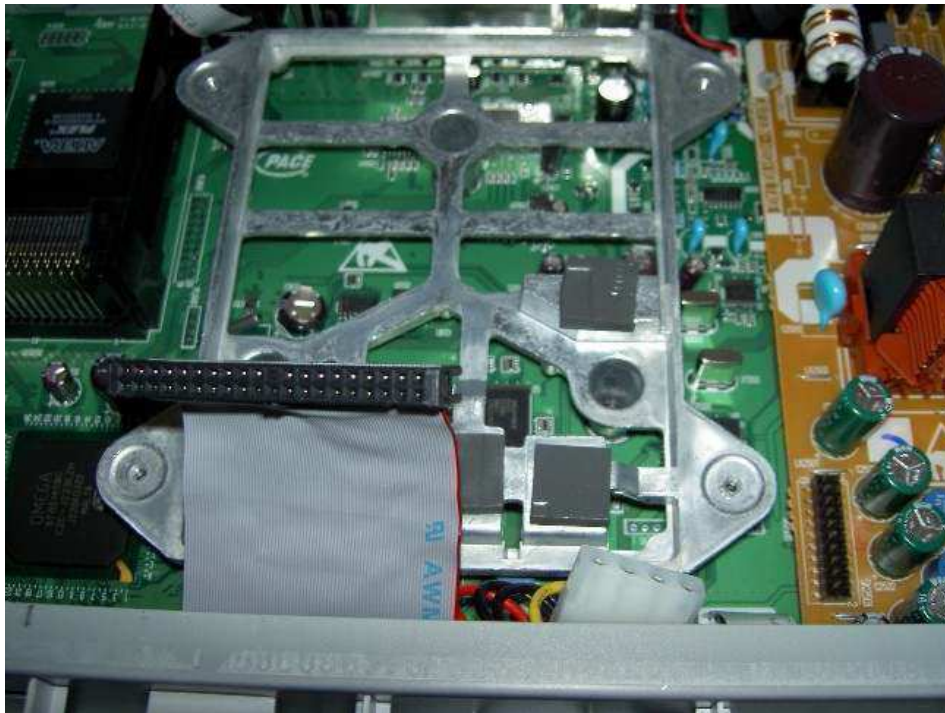

Before you start Press Services Select SKY Setup and set
Instant Rewind to Off and Save New Settings
Make a note of all your series links as these must be re entered
Put Sky in standby and disconnect the power cable Also if you've got
the patience allow 10 minutes for the old drive to cool down
Unplug all other cables remove the lid it slides back
Torx Type Security Bit Required Screwfix Direct or Maplin Code GUQ

Unscrew and remove else they will fall out the four screws in the rubber mounts either side of the hard drive

Lift up and carefully unplug the IDE and Pin power cable from the hard drive

Remember to take all necessary precautions to prevent damage by static discharge

Make note of the four thermal transfer pads one out of site as IDE cable is in shot

Make sure these line up well with the main chips on the underside of your new drive

Take the hard disc assembly to a suitable clean antistatic work surface

Slide out the four shock absorbent anti vibration feet

You can now remove the two plates from the sides of your old drive

Philips screwdriver required

and mount them on your new drive

Set the new drives jumper to make it Cable Select as per the drive you removed

Slide the four shock absorbent anti vibration feet back into position and refit the drive in your box again taking care re the alignment of the four thermal transfer pads

Once your box is fully assembled power it up wait two minutes and press the Sky Key

Perform a Full System Reset

Press Services Select Housekeeping

And Wait For Box To Restart normally < 10 mins for a 4 Gb drive and < 10 mins for a 8 Gb drive Again wait two minutes and press the Sky Key

Test for correct operation re-enable Instant Rewind and re-enter your Series Links

Unlocking Sky Box Office

-
-

This process is not recommended if you want movies then

-
-

pay for them you will get caught eventually if you use this method and end up with a criminal record it is not worth it

-

NOTE your default SKY pin number is the last 4 digits of your sky card number for the FIRST SKY card you got if you ve had a replacement card since subscribing then it will be different and you ll need to phone SKY

Unlock Sky

PLEASE READ THE NOTE BELOW FIRST NOTE This information is provided for educational research purposes only and we will not be held responsible for the use to which others put it or for any losses incurred from the use of it This document is in no way designed to encourage piracy or theft or any illegal or immoral behavior This works on about 4 of sky boxes Three methods listed below

-
-

Unlocking Sky Box Office

This really is a simple trick There is a secret installers menu which allows you to add a prefix to the Sky phone number All you need to do is add a false prefix and the box can never phone Sky It is that easy

<> Press Services Press system setup Press then then select to activate secret menu Press telephone settings Scroll to Dialing prefix Enter a prefix of your choice NOT or you don t want the fire brigade round your house at am Scroll to Save New Settings Done Now the box will just get an error message when attempting to send Sky your viewing information

Unlocking Sky Box Office

Sky does know about this loophole but they also can't fix it not for the foreseeable future anyway. Here are the steps to get your free PPV's.

Enjoy

Locate your phone line going into the back of the Sky box

Cut through this phone line anywhere about length down

Strip it and you will see wires. Keep the black and red on one side and the green and yellow on the other

Throw the other bit of the phone line that goes into the wall away or keep it if you like but you'll have no need for it

Now you need one of the V oblong batteries

Put the red and the back wires on one side of the battery and the green and yellow wires on the other

Hold it in place or clip on the battery connector then go to your box office film or whatever pick it and put your pin in it as usual. It won't charge you

If you get a please connect telephone message you haven't stripped the wires enough the battery is not connected or is dead

After the screen clears you can disconnect the wires from the battery. You will never need to reconnect your phone line back to your TV. Sky updates through the satellite on your house and not through the phone line like some people think

VERY IMPORTANT Never reconnect your phone line back to your sky box or you will be charged for everything you have ordered using this method. Now every time you want to watch a PPV just repeat stages and

Unlocking Sky Box Office

Go to a box office channel. Press select. It will now ask you for your pin number. Do not put this in yet. Unplug your digital box from the telephone line. Now enter your pin number _ _ _ _ this is the last four digits on your sky card. Your picture will now come on. When you have watched your movie or sport event. Switch off your sky digital box from the mains for min's. Switch your box back on then plug your telephone back in. This method will reset your digital box so sky will not know you have watched. Anything happy viewing. If the first methods do not work then use this method. This works on nearly all boxes.

Free online tv

You can watch any show or series or movie you want straight from your computer. Click any clip or show you want the video will load and you can watch your favorite movie or tv show online free.

<http://www.pazoena.com>

Update on this site has now been taken down

Try <http://peekvid.com>

or <http://freetvonline.com>

<http://www.watchmovies.net>

[WWW.surfthechannel.com](http://www.surfthechannel.com)

The legal way to get free satellite channels

You may need a few extra pieces of free software for these stations to work

The software you will need is as follows

- Windows media player

<http://www.microsoft.com/windows/windowsmedia/players.aspx> Some of the streams need the latest version of media player so if you have any problems

try updating to the latest version

- Realone player is the next piece of software you may need

<http://www.real.com/index.html> [Fsrc](#)
[Ddownloadr](#) a free version of the software is fine

Please remember all streams and

links do go up and down from time to time just like any other link on the internet

If you find that one of the links is not working come back and try it again later

To watch any of these links just copy and paste the link into your web browser and it should start up the program needed

Within a few minutes you should be watching the TV channel

If it is a link site just click on the link for the channel you want to watch
